How one phone call advances autism research

It all starts with a donation call to Autism BrainNet 877-333-0999.

The brain donation is transported to one of Autism BrainNet's repositories, where it is preserved and stored.

A single brain donation helps facilitate many research studies for decades to come.

The results can contribute to the development of new treatments.

New treatments could improve the quality of life of individuals with autism and related neurodevelopmental conditions.

www.AutismBrainNet.org

Autism BrainNet is a program of the Simons Foundation Autism Research Initiative (SFARI).
