

AutismBrainNet

Advancing research through the gift of brain donation

Donation Process

Autism BrainNet makes the donation process as simple as possible for every family. Donor families are treated with respect and compassion and provided with ongoing support.

Call Autism BrainNet at **877-333-0999** as soon as possible when a death has occurred or is near for immediate assistance.

Autism BrainNet coordinates brain recovery and transportation to our nearest site.

An Autism BrainNet clinician follows up with the donor family to learn more about the donor.

Our staff is available **24/7** and will walk your family through the donation process.

There is no cost to families and brain donation does not interfere with autopsy and funeral plans.
